01 Nursing observation

Record what changed and which follow-up is pending.

Bed & patient

Selected bed

MAT-01

Patient C101 · Cesarean section · Pain 2/5 · 7/8 milestones met

Pain scale: 1–5.

Progress note

Fictional progress note

Discharge authorized. Transport pending; patient still in bed.

02 Ward bed register

Read the status and estimate together. DAY beds are separate day-case capacity.

BED	PROCEDURE	STATUS	ESTIMATED READY (NEW YORK)	COUNTDOWN
MAT-01	Cesarean section	OCC	10/1/2026, 1:15:00 PM	03:15
MAT-02	Cesarean section	OCC	—	Unknown
MAT-03	C-section with repaired bowel injury	OCC	—	Unknown
MAT-04	Next admission	AVL	—	Available now
MAT-05	Bed turnaround	CLN	10/1/2026, 10:45:00 AM	00:45:00
MAT-06	Cesarean section	OCC	10/2/2026, 9:15:00 AM	23:15:00
GYN-01	Laparoscopic hysterectomy	OCC	10/2/2026, 11:15:00 AM	25:15:00
GYN-02	Open myomectomy	OCC	—	Unknown
GYN-03	Next admission	AVL	—	Available now

Read the bed status and estimated time together. **MAT-02 is occupied**, with no confirmed readiness time. A countdown never releases a bed by itself.

AVL = available; OCC = occupied; CLN = cleaning; DUE = awaiting cleaning; HLD = hold. Scroll to see all 20 beds. Day-case beds are separate capacity. Demo only: not for production or real patient information.

02 Write the nurse update

01 Nursing observation

Record what changed and which follow-up is pending.

Bed & patient

Selected bed

MAT-02

Patient C102 · Cesarean section · Pain 4/5 · 4/8 milestones met

Pain scale: 1–5.

Progress note

Fictional progress note

Pain limits walking. Nursing reassessment is pending; departure is delayed.

Include changes in pain, walking or meals, and any pending reassessment.

Select **MAT-02**. This made-up patient has pain **4/5** and **4 of 8 milestones met**. Choose the Needs review practice note, or write what changed and which assessment is pending.

Describe what changed in pain, walking or meals, and which reassessment is pending. This example uses a 1-5 pain scale.

2 / 5

03 Try it, then connect

Practice case (optional)

Practice note

Needs review

A practice answer is written in advance. Jev checks your submitted note.

Ask Jev (uses your API)

Show expected answer (no API)

SAMPLE ONLY — expected answer, no model call. Progress: needs_review
Delay/blocker: Explicit blocker and pending assessment Bed state unchanged.

▼ Jev connection & setup

Server variable: TYPESAFE_API_KEY

Check server setup

Server key configured (not yet verified).

► Connect Jev with your key (optional)

► Submitted note & result

Staff confirm departure and bed readiness.

Show expected answer works without a key. It is a written sample. For a real result, open **Jev connection & setup** and press **Check server setup**. If there is no server key, expand the optional setup and enter your own TypeSafe key for this tab.

Leave the key field blank when a server key is configured. Otherwise, enter your own TypeSafe key for this tab. Keep keys out of screenshots.

04 Help clarify the note

Submitted note for MAT-02: The note may need more detail. Add what changed in pain, walking or meals, and whether reassessment is pending.

▶ Jev connection & setup

Request time: 0.3s.
Model probabilities are not clinical certainty. Bed state unchanged.

Press **Ask Jev**. This actual request returned **unclear** for a vague fictional note. The page asks for more detail about pain, walking, meals and pending reassessment. That helps the writer improve the note; it does not grade the nurse.

Review the submitted note beside the answer. Add the missing observation and ask again when more information is available. Staff still confirm departure and bed readiness.

05 Time room cleaning

03 Room cleaning record

Start-to-finish elapsed time · computer clock · New York timestamps

Room in turnaround

MAT-05

Start clear

5

Finish cleaning

MAT-05 cleaning finished in 2.9 minutes; awaiting staff release.

Local average: 2.9 minutes (1 completed timings).
MAT-05 | Start (New York): 10/1/2026, 11:05:58 PM | Finish: 10/1/2026, 11:08:50 PM | 2.9 minutes

Saved in this browser: room IDs and timestamps only. Finishing the timer does not release a bed. Staff still confirm cleaning quality, equipment, staffing and release.

After the patient has left, select a room already in turnaround. Press **Start cleaning**, then **Finish cleaning**. The timer records elapsed minutes and resumes after a reload. Completion still says **awaiting staff release**.

These are demonstration timings. The log stays in this browser and includes interruptions between start and finish. Cleaning completion still requires staff release.
